

## Theme for iPad and iPhone

### Customizing the vablet Appearance

#### Theme Settings Guide (iOS)

Our app theme feature puts design into your hands, to create the look and feel of your own company app – without the cost and hassle of development. The instructions on the following page will guide you in customizing the following elements of your vablet appearance.

Custom 'Back' Icon

Customize Background Color of Toolbar

Custom Text Color

Background Color

Classic vablet App Theme

'Add Folder' Icon

*This is the new standard theme that will appear for all current and future vablet users on iOS.*

# Theme Settings (iOS)

## Pre-Designed Themes

We've created 4 diverse themes for you to activate in an instant. Simply choose any one of the 5 styles available in the drop-down menu, at the top of the Theme Settings page on the Admin Console. You can make individual adjustments to the pre-set styles, by adding your own folder icon or changing the color of the toolbar.

**Virtual:**

Option 1

Select any one of 5 diverse pre-set styles and implement them instantly, on all devices.

Option 2

Import a color scheme from an exported XML file. This will not include the 3 icons.

Option 3

Choose your own icon to display for Folder, Back and Add Folder commands.

Option 5

Select custom colors here or enter your brand color codes for background, toolbar and text that appears on the vablet layout.

Option 4

You can opt for a solid color background, (in the color boxes in Option 5) or add your logo or other image as your background here.

Adjust the fade or transparency to appear more like a watermark by entering a fade value as a percent.

## Theme Settings (iOS)

NEW Standard vablet Theme

This is the new standard theme that will appear for all current and future vablet users on iOS.

### Device User Specified Layout Options:

#### Create a 'Sweep' Slideshow

Showcase product images or set favorite files for instant access.

1. Turn 'Sweep' feature on for device from the Admin console
2. Turn on 'Sweep' for each file and it will appear in the preview pane.
3. Click the triangle to open preview pane and pause symbol to stop slideshow.

Classic Split Screen Layout is still available by tapping the icon in the vablet toolbar.
