# vablet®

Capture Tools

This guide will show you the basics of our data capture tool called 'Capture'. This is a feature on the Admin Console, enabling you to create a custom survey, training quiz or other data entry form that can be pushed to your device users. All data is aggregated on the console for analysis and reporting.

Step 1

*Login to Your Account at: Admin.vablet.com*

Click 'Capture' from the Main Menu. Then click 'Create New Capture Tool' and enter a name.

Create endless questions from a variety of question types, including a field for **signature** or a **photo** from the device camera!

Step 2

Capture Tool Overview & Edit

Click the ▲▼ symbols to rearrange the order of your questions or click the red symbol to delete it.
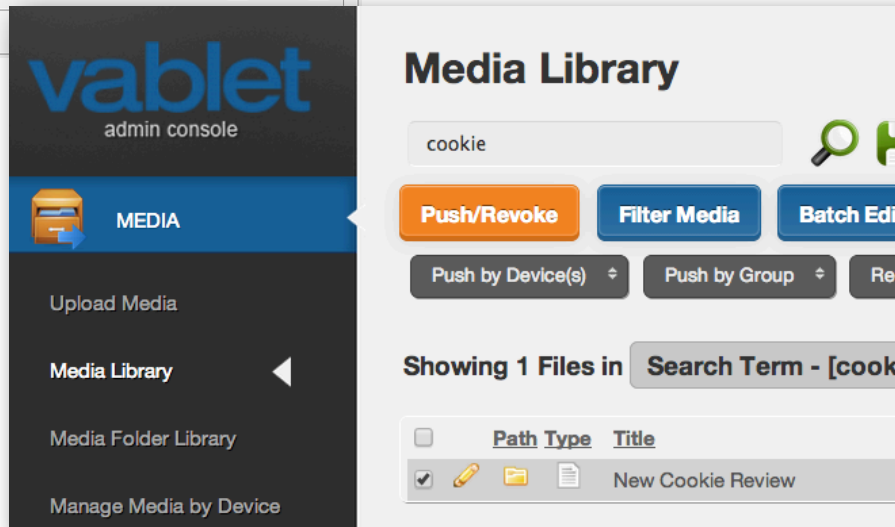

Step 3

Push the Capture Tool

Go to Media Library to Push the Capture Tool

Your Capture Tool will automatically be added to your Media Library, just like any other file type you upload. Click the pencil symbol to edit settings and permissions, assign it to groups or folders, customize your thumbnail and more!

Then Simply Push the file to any device.

iOS ONLY

Step 4
Launch vablet and Test-Drive Your Capture Tool

Your Capture Tool will instantly sync to your device, just like any other file that is pushed from the web console.

Step 5
Survey Says.....! 🥧

View compiled data of your Capture Tool on the Admin Console.

Simply return to **Capture** in the main menu and click the chart symbol.

BONUS: Analytics! Don't forget, additional analytics on your Capture Tool are available under Analytics and Reporting, from the main menu.

Advanced Feature
Integrating Custom HTML To Work with Capture
(PDF forms are not compatible with iOS devices.)

You can import your own customized HTML Form.
(Developers: consult the vablet HTML Code Guide Option #5)

Simply import your external HTML file during Step 1, on the same screen you Create a name.

The questions within your file will appear. **DO NOT MODIFY OR UPDATE** the file from this screen.

SKIP STEP 2 and proceed to Step 3 to push and test your Capture tool on a device.

Data Capture Tools

CAPTURE SETTINGS

Create Cancel	
Capture Title:	Sales Demo – HTML
Auto-Notify:	OFF
PDF/Html File: (optional)	Choose File BloxV8.zhtml
