

POWERPOINT PRESENTATIONS ON ANY DEVICE

Build it in PowerPoint. Tap Play anywhere.

A 2 GB deck with every animation, transition and video intact. It opens instantly on a phone, works with no signal, and runs itself when you tap Play. Your team keeps authoring in the tool they already know. vablet does the rest.

IT TOOK US A YEAR TO BUILD. IT TAKES YOU ONE UPLOAD.

Most platforms show you a picture of your slides. vablet Play plays your presentation: the builds, the timings, the video and the transitions, exactly as you designed them, on every device your reps and customers carry.

2 GB

The largest deck you can upload.

100%

Animations, transitions and video, preserved.

0

Downloads, plugins or installs for the viewer.

Locked

Slides cannot be removed, extracted or rearranged.

Per slide

Know how long each slide held attention.

Instant

Share a link or QR code. Nothing to download, it just plays.

HOW IT WORKS

Three steps. Nothing to learn.

1

Upload your deck

Drag any .pptx, up to 2 GB, into the vablet admin console. Animations, transitions and embedded video are all welcome.

2

Set who sees it

Assign a folder and a group. Decide whether each audience can view, email, or download the original file.

3

Tap Play

vablet builds the Play version automatically (about 15 minutes for a typical deck), tunes every video for mobile, and delivers it to every authorized device. Tap Play and the deck advances on its own.

REPLACE ONCE. CURRENT EVERYWHERE.

Replace the PowerPoint once and vablet regenerates the Play version, revokes the old one on every device, and updates every link and QR code you have ever shared, including the ones already printed. A shared deck cannot keep showing retired claims, which helps prevent the outdated-content findings that lead to a CAPA.

WHY IT MATTERS

Big decks break everywhere except here.

Email a PowerPoint over 25 MB and most mail servers bounce it or turn it into a download link. Open a deck in a browser viewer and Microsoft documents what you lose: slide shows play only the Fade and Wipe transitions, embedded media is capped at 100 MB, and adding any video that is not from YouTube requires the desktop app. Your deck was built to move. On the receiving end, it stands still.

vablet Play has none of those ceilings. Files up to 2 GB. Every transition. Every video, re-encoded for mobile so it plays on the first tap.

SIDE BY SIDE

Capability	Raw .pptx	vablet Play
Opens without software	Requires PowerPoint	Any device, any browser
Files over 25 MB	Bounced by mail servers or forced to download	Opens instantly, up to 2 GB
Transitions in a browser	Fade and Wipe only in PowerPoint for the web	All of them
Embedded video	100 MB cap in PowerPoint for the web	Re-encoded for mobile, plays on first tap
Offline viewing	Needs the app and the file	Built in
Slide extraction	Fully editable	Locked
Update after sharing	Re-send the file	Links and QR codes update themselves
Viewing analytics	None	Per slide, per viewer

THE BUILT-IN PLAYER

More than slides. A presentation player.

Thumbnails, speaker notes, sound control and Play in an optional player bar. Show it for training and self-guided review, or hide it for a clean, full-screen customer experience. Once synced, presentations play with no connection: hospitals, factories, basements, airplanes.

PROTECTED AND MEASURED

Present securely. Know what happened next.

Slides cannot be extracted, edited or reassembled, so your content stays exactly as approved. Every Play presentation reports which slides were viewed and for how long, whether a rep presented it live or a customer opened a shared link.

WHO IT IS FOR

Life sciences and medical device teams who need every shared deck to be the approved version. Field sales in manufacturing, banking and private equity who present where there is no signal. Marketing teams tired of compressing video to squeeze under an attachment limit. If your company makes presentations in PowerPoint, vablet Play is for you, and it is included in every vablet plan.

Bring your biggest deck.

A 20-minute demo on an iPad with Wi-Fi off. Watch a 2 GB PowerPoint presentation open on the first tap. Book at vablet.com/book-a-demo
